

PROJECT TITLE:

To-Do List Application

OBJECTIVE:

To create a simple task management application using Python Tkinter.

SOFTWARE REQUIREMENTS:

- Python 3.x
- Tkinter Library

MODULES:

1. Add Task

- User enters task.
- Task is added to list.

2. Delete Task

- Removes selected task.

3. Clear All Tasks

- Deletes all tasks after confirmation.

ALGORITHM:

Step 1: Create GUI window.

Step 2: Add Entry widget for task input.

Step 3: Add List box for displaying tasks.

Step 4: Create Add button.

Step 5: Create Delete button.

Step 6: Create Clear button.

Step 7: Run application.

OUTPUT:

Users can manage daily tasks through a graphical interface.

RESULT:

Successfully implemented a To-Do List Application using Python Tkinter.
